Building Bridges over Broken Places

Fatherhood Classes

We provide support, education and resources. The curriculum is 8 weeks in duration. It is a product of the National Partnership for Community Leadership on Fatherhood Development. The facilitators will provide a supportive environment. This is a group-based format so active participation is required. This is also a safe confidential place where you can share. Child Support responsibility management is offered by our partners. If you have roadblocks that keep you from being the father, you desire to be we can help. We assist with legal services, child support information, and a skill building class to identify the value of being a successful parent.
